R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. Hello You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
##  1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##  Mean   :15.4    Mean   : 42.98
##  3rd Qu.:19.0    3rd Qu.: 56.00
##  Max.   :25.0    Max.   :120.00

## # A tibble: 6 x 4
##       id names      salary surname
##   <dbl> <chr>      <dbl> <chr>
## 1     1 James      1000 mcminn
## 2     2 Phil       3500 macparlane
## 3     3 Natalia   1500 Martinez
## 4     5 Jesus     4200 Oliviera
## 5     4 <NA>      1785 Lukaszewicz
## 6     6 <NA>      7000 Gonzalez
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
